These transitions can appear as different lines between different shades of color. The presence of 3072 shades of gradation helps to minimize the false contouring artifact so that the color transitions get a smooth, natural look. HDTV (ATSC) Tuner: With a built-in over-the-air HDTV (ATSC) tuner you don't have to buy a separate digital body drawer to receive and decode over-the-air HDTV/SDTV signals. Home resolution: The TH-50PX75U has a display resolution of 1366 x 768. All incoming signals are converted to this home resolution. HDMI digital inputs and video components inputs will take 1080p, 1080i, 720p, 480p, and 480i, and will display them as 1366 x 768. Progressive Scan Doubler: Progressive Scan Understudy displays a full frame of video in 1/60th of a second by de-weaving incoming intertwined video signal and gradually scanning the image. This scanning understudy also provides even more enhancement of the image by improving the quality of the diagonal lines in moving images. Aspect modes: Depending on the input, you can choose from the following aspect modes: 4:3: displays image 4:3 in standard size with gray stripes on the sides zoom: increases the image evenly (vertically and horizontally), so that the top and bottom are cut off (recommended for letter sources) Full: stretches the image horizontally to fill the screen (for anamorphic sources) Simple: stretches 4:3 images to fill the screen, but with the correction aspect is applied on the sides of the screen so that the extension is manifested only on the left and right edges of the screen (recommended for conventional television broadcasts) H-Fill: increases 4:3 image horizontally to fill the screen, the lateral edges are cut off to adjust to adjust : You can adjust the vertical size and position of the image when scaling mode. Image mode: You can choose from the following modes of image: Bright: provides increased contrast and sharpness when In a well-lit room Standard: recommended for normal viewing conditions with muted movie room lighting: to watch movies in a dark room, provides a soft, film-like picture setting: Multiple image settings can be individually adjusted, including images (white areas). brightness (dark areas), color, shade. sharpness, and color temperature. Color control: When you turn on, color control improves green and blue playback. This is especially useful for outdoor scenes. Black Level: You can adjust the black level of the TV to dark or light. Video NR: Video Noise Decline removes snow from weak analog TV signal. MPEG NR: MPEG Noise REDUCE reduces the noise level typical of digital signals. 3D-Y/C Digital Comb Filter: This filter minimizes noise and cross color in the picture when composite video input is used. Color Matrix: When viewing the input signal through the video input component, this TV will automatically optimize the color parameters based on the color matrix settings: SD: standard analog HD TV: high-definition 480p TV: only 480 lines of progressive signal accepted, not SDTV equalizer synchronization: THE equalizer synchronization HDAVI Office allows you to manage all of your Panasonic HDAVI Control compatible components of the home cinema. Panasonic's HDAVI Control equipment allows you to do the following things: automatically switching input, turning power on the link, turning off communications, and controlling the speaker. SD Card Slot: SD Card Slot on the front of TH-50PX75U allows you to view photos of JPEG on an SD or miniSD card. The adapter is required to use the miniSD card. You can view images as sketches (up to 12 images), view them individually, allowing you to rotate the image clockwise or counterclockwise or view them as a slideshow, with an adjustable duration of the image. You can adjust the length of the slideshow between 1-10 seconds, 15, 20, 30, 45, 60 or 120 seconds. You can also customize your TV image settings for your photos. GalleryPlayer: GalleryPlayer allows you to view high-definition artwork and photos purchased or uploaded to an SD card. GalleryPlayer provides pre-loaded SD cards with protected copies of images and images to download to your computer that can be stored on your SD card for display on your TV. Audio adjustment: Television has an independent bass, high frequency and balance audio setting. Environment: The surround function improves the sound response when listening to stereo programming. This feature is only active for built-in TV speakers. AI Sound: AI Sound aligns overall levels all channels and external inputs. Audio level: The audio leveler tracks the difference in sound levels between inputs and minimizes volume changes when input changes. This feature is only active for built-in TV speakers. Image caption The TV includes a built-in decoder that is capable of providing a text display display Audio. The program being reviewed must transmit information about the closed signature (CC). The TV has analog and digital close signatures. Analogue: CC1-4: displays information related to photos (appears at the bottom of the screen) T1-4: displays textual information (appears on the entire screen) Digital: Digital closed signature menu allows you to customize the way you view digital signatures when viewing a digital station with (CC). You can customize size, font, style, foreground, opacity, background and contour settings. Entry tags: Each entry can be marked to reflect the source connected. Label options: Skip, VCR, DVD, cable, DBS, PVR, Game, and (empty). Skip input: If the input tag is set to skip, that entry is not selected when toggling through the inputs with the TV/Video button. Favorite channels: Channel numbers can be registered as favorites and displayed in the TV's Favorite Melody menu to facilitate access. Lock: The lock feature has four settings to block viewing of certain channels or inputs. Creates a 4-digit password that you need to bypass the lock. Available Settings: Off: Nothing Is Blocked Everything: All Channels and External Entrances Are Blocked By Custom: Blocking Certain Inputs channels, gaming systems and parental control programs: This TV includes V-Chip technology that allows you to set a viewing restriction based on TV and movie ratings. The restriction is set up for specific industry ratings. The control is available and protected by a four-digit password. Sleep timer: This TV is equipped with a built-in sleep timer installed by a remote control that automatically turns off the TV after 30, 60 or 90 minutes. Programmable Timer: Programmable timers allow you to program your TV to turn yourself on and off at the appointed time, on scheduled days, tuned to designated channels. You can program up to 5 events with timers. The event can have several episodes (Daily, Mon-Fri, Every Svedya, etc.). Note: The TV automatically shuts down after 90 minutes when the timer is turned on. This operation will be cancelled if the time is switched off or if the key is pressed. Automatic shutdown: To save energy, the TV can be set to automatically turn off when no signal lasts more than 10 minutes or when there is no remote control or front of the control key for more than 3 hours. Remote Control IR Wireless Remote: Supplied by IR Wireless Remote (N2'AYB000103) is a full-featured remote control designed for THE work of the TV. The remote will run certain panasonic hardware features with HDAVI control connected HDMI automatically through the synchronization function Tv. Ins and outs Notes 1080p HDMI Entrances: The TV has two HDMI inputs that support 1080p. HDMI terminals can accommodate a copyable digital connection (HDCP) with other devices (such as digital set-top boxes) that have compatible interfaces. When using an adapter to connect the component to the DVI DVI output 1 entry can be used with its dedicated stereo RCA socket to carry the beep. Component Video Entrances: Two component video inputs will take 1080p, 1080i, 720p, 480p and 480i input. Digital Audio Out: The rear panel optical digital output allows you to send Dolby Digital bit stream Dolby Digital Receiver or Decoder. If the program doesn't include the Dolby Digital soundtrack, the PCM bit stream is the output. SD card slot: The TV features a slot to easily view digital photos with the front of the SD card. The SD card slot is compatible with up to 4GB SDHC, up to 2GB SD cards, and up to 1GB mini cards (mini cards require a miniSD card adapter). Mount Pedestal: The included pedestal stand can be attached to the TV and the TV can sit on the countertop, shelf or TV stand. The weight of the TV, including the pedestal, is 99.2 pounds. The pedestal stand comes in three pieces including a pedestal base and two pedestal poles. Pedestal poles attach to the base using four supplied M5 x 16 screws machine, and then a pedestal stand is attached to the TV using four supplied M5 x 30 screws machine. Mounting wall: At the back of the TV there are four threaded inserts to attach the wall fastening bracket. The inserts require M8 bolts and an interval of 25.9375 wide x 13,375 high. The weight of the TV without a pedestal is 83.8 pounds. Pounds. panasonic th-50px75u manual. panasonic th-50px75u service manual
